# PRESCRIPTION DRUG PROGRAM FORMULARY

EFFECTIVE JANUARY 1, 2010

[www.MyAHATPA.com](http://www.MyAHATPA.com)

Dear Participant:

In an effort to continue our commitment to provide you with comprehensive prescription drug coverage, a formulary feature is included in your prescription drug benefit. A formulary is a list of selected FDA-approved prescription medications reviewed by the FutureScripts® Pharmacy and Therapeutics Committee. These prescription medications have been selected for their reported medical effectiveness, safety, and value, while providing you with the highest level of coverage under your prescription program.

**The following information serves as a guide when reviewing the list of formulary drugs on the following pages:**

- **Bolded drug** = Formulary generic available at lowest copay.
  - Non-bolded drug = Formulary brand available at middle copay.
  - Drug in parenthesis ( ) = Non-formulary brand drug available at the highest copay. It is displayed next to the equivalent formulary generic drug that is available at the lowest copay. For example: **amoxicillin** is the formulary generic drug available at the lowest copay. (Amoxil) is the non-formulary brand available at the highest copay. In most cases when brand drugs have a generic equivalent, the generic version is formulary and the brand version is non-formulary.
  - Covered generic drugs not listed are formulary and are available at the lowest copay.
  - Covered brand drugs not listed are non-formulary and are available at the highest copay.
- ✓ = New formulary drug.

The above information is highlighted in a key box on every other page of the formulary list.

Our pharmacy benefits manager, FutureScripts, continuously monitors the effectiveness and safety of drugs and drug prescribing patterns.

**Please note: Because prescription drug programs vary by group, the inclusion of a drug in this formulary does not imply coverage. This formulary is subject to change. Please call 1-888-678-7013 if you have any questions about your prescription drug benefits. Please discuss any questions or concerns about your drug therapy with your physician or pharmacist. Prescription Drug Program Formulary information can also be obtained at [www.MyAHATPA.com](http://www.MyAHATPA.com).**

Dear Physician:

This is a listing of formulary medications to be considered for your patient, a Prescription Drug Program Formulary participant. Please refer to this Prescription Drug Program Formulary in order to choose a medication. Because prescription drug programs vary by group, the inclusion of a drug in this formulary does *not* imply coverage. This formulary is subject to change.

Please understand that this formulary is not intended as a substitute for your independent professional judgment. Rather, it is offered as a tool to help our members recognize formulary drugs. We hope that you will refer to the formulary as a guide to prescribing formulary drugs.

## **Prescription Drug Program provider payment information**

FutureScripts is an independent company that performs pharmacy benefits management (PBM) services for AmeriHealth Administrators. The PBM also negotiates price discounts with pharmaceutical manufacturers and provides drug utilization and quality reviews. AmeriHealth Administrators anticipates that it will pass on a high percentage of the expected rebates it receives from its PBM through reductions in the overall cost of pharmacy benefits. Under most benefits plans, prescription drugs are subject to a member copayment.
